One of the fondest memories that a child could have was when their parents read them bedtime stories. It all starts with the fairy tale stories that our parents used to read to us at bedtime.

The value of reading has always been important to the development of a child's social, cognitive, and emotional aspects. In fact, studies reveal that children who are exposed to reading at an early stage are more likely to excel academically. It is important to have a story that is up to date and that children can easily compare with the current situations they have.
